

For the audio enthusiast who wants the best!

Pinell is launching its new flagship model today, the Pinell Supersound 901. This innovative complete hi-fi system represents the perfect solution for those who want to optimize space utilization without compromising on sound quality.

"We see a clear trend towards a simpler audio system with higher design requirements. The Pinell Supersound 901 meets these expectations with timeless Norwegian design, premium materials, user-friendly app control, and traditional operation. In addition, the Pinell Supersound 901 delivers a rich sound experience thanks to two tweeters, two bass/midrange speakers, and an integrated subwoofer placed underneath, powered by an impressive 80 watts RMS," says Tom Vedvik, Product Manager at Pinell.

The Pinell Supersound 901 is equipped with smart features such as WiFi, Bluetooth streaming, and Spotify integration. It also includes FM/DAB+ radio, CD player, and TV audio connection. With Pinell smartradio, you get access to internet radio channels and podcast series from around the world, and the Pinell Supersound 901 can be operated with a remote control, the OKTIV app, or directly on the control panel.

Highlights

The Supersound 901 features a timeless design that fills the entire room with precise and rich sound. The fabric is from the renowned quality brand Kvadrat and is 100% climate-neutral produced in Norway.

Both digital and analog audio sources can be connected to the Pinell Supersound 901.

The Supersound 901 comes with a remote control with 10 direct preset buttons. (You can also control the radio wirelessly with the OKTIV app).

Two tweeters, two bass/midrange speakers, and a built-in subwoofer provide exceptional sound with a power of 80 watts RMS.

The OKTIV app controls all essential functions, and if you have multiple Pinell smartradios, they can also be controlled from the same app!

About Pinell

The Pinell brand was established in 2008, ahead of the introduction of digital radio in Norway. Pinell entered the scene with its first product, an Internet/DAB radio with over 30,000 channels, marking the beginning of Pinell's commitment to developing high-quality audio products. Since then, Pinell has grown to become a market leader in the radio segment in Scandinavia, with a focus on Smart Radio and DAB Radio. With over 500,000 units sold in Europe, Pinell is a well-established brand with superior sound and top-quality design.
